[Portfolio](#)

I am a Full-Stack developer with solid professional experience building and maintaining web applications. I specialize in PHP, Laravel, and the TALL stack, with a strong focus on scalable backend systems and efficient frontend integration. I leverage AI-assisted development tools and structured workflows to improve productivity, code quality, and system design.

EXPERIENCE

DVLOPER – Full Stack Developer — February 2026 – Present

Contributed to the architecture and development of multiple complex digital products for international clients under NDA, focusing on scalability, performance, and maintainability:

B2B HR Tech Platform: Contributed to core migration to PHP 8.2, containerization with Docker, centralization of sensitive configurations using .env files, and optimization of dynamic application workflows.

AI SaaS for Instagram: Led the UI and monetization ecosystem using React, Zustand, Stripe Checkout, and Laravel Cashier v16 under Clean Architecture principles.

European Corporate Exchange: Delivered a pixel-perfect responsive rebranding of the landing page using Vue 3 and Inertia.js on Laravel 12, enhancing visual consistency and frontend performance.

Tech Stack: PHP 8.2/8.3, Laravel, React, Vue 3, Inertia.js, Stripe, Tailwind, Docker.

Andrestelocambia – Laravel Backend Developer — December 2025 – February 2026

Executed a full rebranding of the platform's Landing Page and User Panel, migrating the entire interface from Bootstrap to Tailwind CSS. Refactored critical modules such as the money transfer flow to improve scalability. Additionally, implemented key features including Google OAuth authentication and an integrated Google Reviews system via SerpApi, developed under strict SOLID architecture principles.

Tech Stack: PHP 8.3, Laravel 11, jQuery, Docker, Git, GitHub, Tailwind.

Imagine Apps – Laravel / Flutter Semi Senior Developer — October 2025 – November 2025

Participated in the refactoring and modernization of a Laravel backend, migrating it from Laravel 10 to Laravel 12. Worked with PHP 8.3, Docker, and Git, focusing on architectural improvements, code maintenance, and preparing the system for a future backend reimplementing using FastAPI.

Tech Stack: PHP 8.3, Laravel 12, jQuery, Docker, Flutter, Git, GitHub, Basecamp.

DVLOPER – PHP Backend Developer — February 2025 – October 2025

Full-stack developer responsible for creating frontend modules with Livewire3 and TailwindCSS3, as well as maintaining and implementing new functionality on the backend using Laravel 11 to ensure proper and efficient integration with Livewire modules.

Tech Stack: PHP 8.4, Laravel 11/12, Livewire 3, Tailwind 3, Docker, Git, GitHub.

Universidad Cooperativa de Colombia – Montería Campus – DARC Analyst — July 2024 – December 2024

I was responsible for the comprehensive management of academic processes, from admissions to graduation, optimizing procedures and ensuring alignment with institutional policies. I trained professors and administrative staff in the use of information systems utilized by the university, improving institutional management.

During my time on the team, I developed a guide valued by the management, detailing and structuring the steps to optimally execute the processes associated with the role, ensuring compliance with institutional guidelines. Additionally, I tracked and resolved special cases that exceeded the parameters established by the institution.

I developed an IT Asset Management System, optimizing the workflow for lending technology equipment. This centralized platform improves operational efficiency and resource accessibility, resulting in reduced response times and enhanced inventory management.

Tech Stack: Excel, Oracle PeopleSoft, PHP 8.4, Laravel 12, Livewire 3, Tailwind 3, Git, GitHub.

DISTRACOM - Junior Development Analyst — November 2023 – February 2024

I provided comprehensive support to fuel stations, addressing a wide range of issues and challenges. This included data management using SQL Server and other internal software tools.

During my time with the team, I developed an extensive guide that thoroughly documents all the knowledge acquired. This guide was highly valued by management.

Additionally, I took on a proactive role in identifying areas for improvement in existing processes. While at the company, I created and modified SQL scripts from scratch, significantly optimizing daily operations by automating tasks that were previously performed manually using tools like Excel.

Tech Stack: Excel, SQL Server.

SKILLS

Programming Languages: Advanced: PHP; Intermediate: JavaScript;

Frameworks and Tools: Advanced: Laravel, MVC; Intermediate: Livewire, [Filament](#), Git, GitHub, PHPUnit, Pest, TailwindCSS, SOLID, Clean Code, jQuery, Docker, Basecamp.

Methodologies: Intermediate: Scrum.

Database: Intermediate: MySQL, PostgreSQL, SQL Server.

Languages: EF SET English Certificate (C1 Advanced); Native: Spanish.

AI & Automation:

- Artificial Intelligence (AI) tools for software development: Cursor, Claude Code, Gemini CLI, OpenCode, Antigravity
- Automation of development workflows and repetitive tasks using AI-assisted tools
- Integration of AI tools into development environments (plugins, agents, CLI tools, skills)
- Experience with AI workflow frameworks (e.g. Gentle AI) to enhance AI-assisted development workflows and agent-based automation.

EDUCATION

[Universidad Cooperativa de Colombia](#) – Montería, Córdoba. *Systems engineer, January 2018 – December 2023.*

[Politécnico Superior de Colombia](#) – Medellín, Antioquia. *Diploma in University Teaching and Didactics, January 2024 – February 2024.*

CERTIFICATES

[AI Development Certificate](#) – BIG School.

[Electronic Invoicing API Integration \(Factus\)](#) – HALLTEC S.A.S.

[Laravel Web Services Course](#) – Codigofacilito.

[Professional Laravel v8 Course](#) – Codigofacilito.

[Write PHP Like a Pro: Build a PHP MVC Framework From Scratch](#) – Udemy.

[PHP Unit Testing with PHPUnit](#) – Udemy.

[Professional Database Course](#) – Codigofacilito.

[SQL: Complete SQL Course – Learn from Scratch](#) – Udemy.

[PostgreSQL: Complete PostgreSQL Course – Learn from Scratch](#) – Udemy.

[SQL Server Masterclass: From Zero to Professional Level](#) – Udemy.

[English Certificate](#) – EF SET English Certificate (C1 Advanced).
